Comments: Dear Mr. Shapiro, I just wanted to say Thank you for your program. As a low income person I thought I was doomed to never hear again after my old hearing aids gave out. I thought I would never talk on the phone again, or ever hear my grandchildren. One who was born while I had no aids. I had never heard his sweet voice. When I received my aids in January, I was so thrilled. I am hearing sounds that I have never heard before; even with old ones I had never heard certain sounds. I can hear my furnace running.(thank heavens it works!) I can hear the phone ring, I can talk to my Mother, I can talk to my children on the phone. It is so much fun to listen to sounds and guess what they are.(and hear my grandchildren and my children) I am so glad that there is such a program for people like me, and others that have no hearing. I hadn't heard of this program until a young woman Donya Smith of TRIPIL brought it to my attention and helped me fill out the application and the loan process. She was such a wonderful help. And a woman Dana Falappi of "Hear-n-Care" who fitted me for the molds, and received the aids for me and fitted them for me. Again, Thank you so much!
