Re: Help America Hear Program

Dear Sir/Madam:

It is a true miracle to be able to hear again! Until I met you folks from the Foundation of Sight & Sound I had no idea how frustrating it was for my family to have to continually repeat themselves when talking to me. I lived in a virtually silent world. I had to have the volume of the television turned up to the highest level. You could actually hear the television from outside of the house as if you were in the same room watching it with me! It was not comfortable for my other family members to even have a normal conversation in the next room due to the high volume of my television! I had to turn it up just so I could hear it!

I'll never forget what a wonderful feeling I had when I went outside with my new hearing aids for the first time and I could actually hear birds chirping and the wind blowing through the leaves on the trees. I could hear everything everyone said to me the first time without shouting. I even pronounce my words clearer because now I can hear! My television is down to a normal level and I can attest to you that everyone in our household is happier for it!

Not being able to hear affected all areas of my life. Now that I am able to hear again I am able to live a richer more fulfilling life with my family all thanks to the Foundation for Sight and Sound! I cannot thank you all enough for giving me my hearing back! It has made a world of difference to me and my family!

Sincerely,

John F. Moltion
