

To All Those At The Foundation for Sight and Sound

I would like to express my gratitude and appreciation to the foundation and the generous, kind people who are responsible for making the quality of my life much better. In view of the failing physical disability of my situation and faced with decreased mobility from Post Polio Syndrome. I was overwhelmed with discouragement and distress and felt like I had little hope left. My hearing loss was hindering the last thread I had left to the quality of my life. Not being able to hear puts a person in a strange, silent, empty world. The hearing aids have drastically improved my daily and social life. It has enabled me to take part in conversations that I could not make out or understand before. It has opened once again the lines of communication within my family circle. It has provided me the opportunity to hear while attending Christian Services and Worship. I can once again hear the birds in the trees, the leaves rustling in the wind, water trickling from the rain and instruments in the sounds of music. All of which are simple beautiful natural sounds taken for granted, until it is taken away. I cannot express enough to you, my heartfelt gratitude and appreciation once again for the foundation and all the generous, kind people involved for making the quality of my life so much better.

Many Warm Thanks

Marguerite Gomez
